

APPLIED-AI STUDIO · SINCE MMXXII · KUALA LUMPUR · BERLIN LINEAGE

Intelligence, with integrity.

We scale, optimise, build and maintain the digital footprint of values-aligned businesses — the software, AI agents and growth systems modern companies run on.

Anyone can use AI now. Almost no one turns it into systems you **trust**.

Ummah Collective is a boutique applied-AI studio founded in Kuala Lumpur in 2022, on a Berlin agency lineage reaching back to 2014. We pair European execution standards with genuine cultural fluency across Southeast Asia, Europe and the Gulf — and we grew into AI as it matured, rather than appearing when it did.

Our philosophy: we build digital assets, not temporary traffic. As acquisition costs rise, the brands that win own their search visibility, their narrative and their ecosystem. We build to that standard because our own products run on the same stack we sell.

(01)

Agency

Software, AI agents, automation, web and growth systems for values-aligned clients worldwide.

(02)

Ventures

Products we own and operate on our own balance sheet — built to the same standard.

100+

Client projects across three continents

60+

Clients worldwide — SMEs to enterprise

12+

Years of craft behind the studio

6

Languages we design, write and ship in

Three continents. One standard.

We have scaled, optimised, built and maintained the digital footprint of halal and values-aligned businesses across industries — from Islamic finance to F&B to cosmetics — and across markets from Kuala Lumpur to Berlin to the Gulf.

Beauty & cosmetics

Retail & e-commerce

Education

Public sector

NGOs & charity

Engineering

Events & hospitality

Beverages

Kids & family

Six vendors. Or **one partner.**

Most companies run their digital footprint in fragments — an agency for ads, a freelancer for the website, a tool nobody configured for CRM, and no one responsible for AI. Every seam between vendors is a place where leads, data and money leak.

We build and run the whole footprint as one system — branding, web & software, sales & outbound, advertising, HR & recruiting, AI & automation — so every part feeds the others. That is what “digital assets, not temporary traffic” means in practice.

→ **One partner, one standard, one system that compounds.**

Branding

Identity, positioning and the perception that earns premium prices.

Web & Software

Sites, platforms, apps and CRMs — owned assets, not rented tools.

Sales & Outbound

Lead lists, sequences, WhatsApp and agents that fill the calendar.

Advertising

Google & Meta performance with honest tracking and CRO.

HR & Recruiting

Career platforms and recruiting automation that hire while you work.

AI & Automation

Agents and workflows that carry the repetitive load 24/7.

Agents and automation carry the repetitive load so your team carries the relationship.

01 · AGENTS

AI Agents

WHAT WE DELIVER

- Sales, support and back-office agents on WhatsApp & web, 24/7
- Multilingual, on-brand, guardrailed before launch
- Booking, qualifying and order handling while you sleep

WHY YOU NEED IT

Your customers message at 11pm — whoever answers first wins the deal. Headcount scales linearly; agents don't.

→ **Every enquiry answered in seconds, in any language — more deals from the same traffic, without new hires.**

02 · AGENTS

Automation & Workflows

WHAT WE DELIVER

- Lead-to-deal, order-to-cash, invoice intake, recruiting flows
- Systems connected end-to-end — no copy-paste in between
- Reporting that assembles itself

WHY YOU NEED IT

Your team's hours disappear into work software should be doing. Every manual handoff loses time, data and the occasional customer.

→ **Hours back every week, fewer errors, faster cash cycle — quotes, invoices and follow-ups that send themselves.**

Your AI workforce, wired in.

Agents are not a chatbot widget. They sit between your channels and your systems — every enquiry answered, qualified, booked and logged, with your team handling only what genuinely needs a human.

One layer, every channel: the same agents answer WhatsApp, web, email and social — and write everything into your calendar, CRM and invoicing. Guardrailed and approved before a single customer sees them.

Own your software and your data — systems that fit your process, not the other way around.

03 · SYSTEMS

App & Software Development

WHAT WE DELIVER

- Custom applications and platforms, shipped in weeks
- APIs, integrations and payments done properly
- Software you own — not a subscription you rent

WHY YOU NEED IT

Off-the-shelf tools force your business into their process. Owning your software means your process, your data, your margin.

→ **An asset on your balance sheet that compounds — instead of a fee on your P&L that expires.**

04 · SYSTEMS

Custom CRM

WHAT WE DELIVER

- One command center: pipeline, clients, invoices, analytics
- Built on the Noon OS foundation — from €19/mo to fully custom
- Halal-economy aware: compliance, multi-currency, multi-language

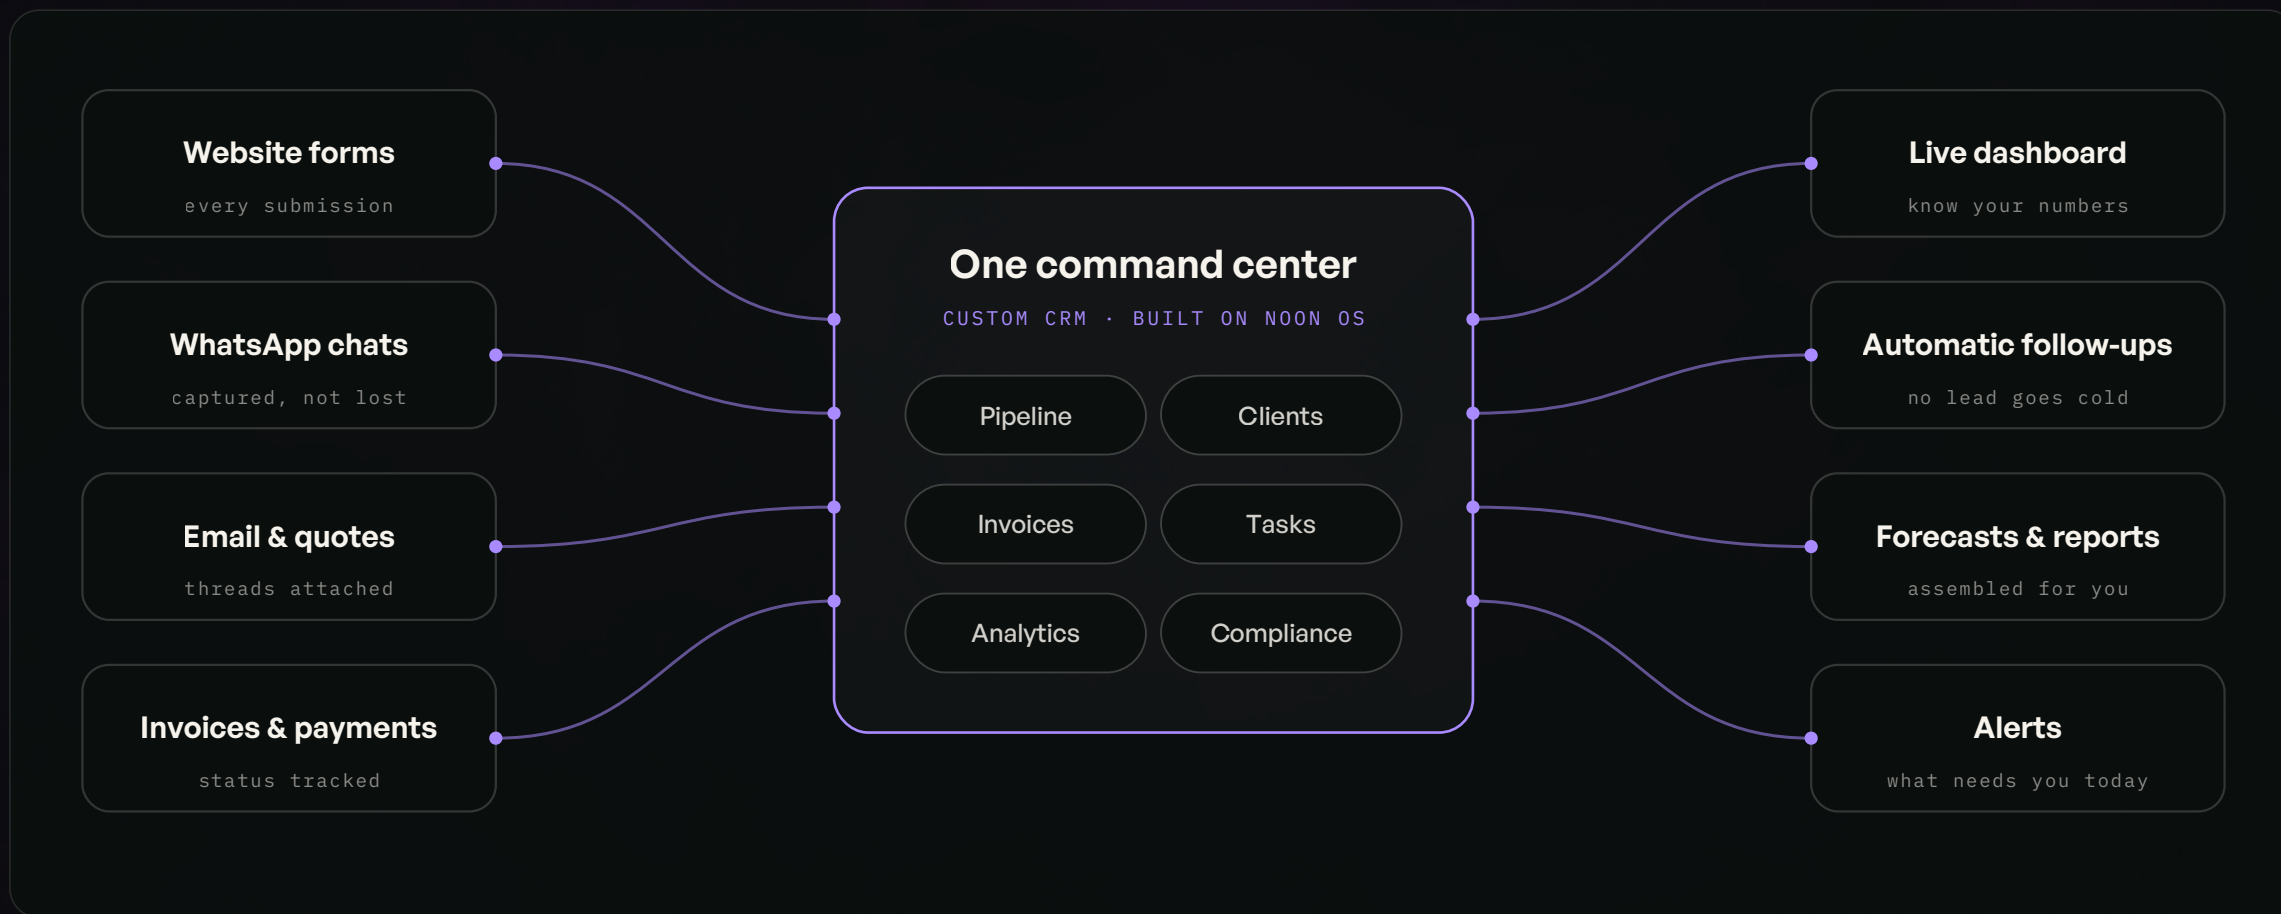

WHY YOU NEED IT

Five disconnected tools means no single truth — deals slip in the gaps between spreadsheets.

→ **One screen with every deal, client and invoice — nothing slips, and forecasting becomes real.**

Every channel in. One truth out. Nothing slips.

Forms, chats, quotes and payments all land in one system — and the system answers back with dashboards, follow-ups and forecasts.

This is the same architecture our own studio runs on — and the foundation of Noon OS. From €19/mo standard to fully custom-built for your operation.

The storefront layer: brand and web that make you the credible premium choice.

05 · STUDIO

Web Design & Platforms

WHAT WE DELIVER

- Premium websites and e-commerce, multilingual by design
- Engineered for conversion and search from day one
- Performance, analytics and tracking built in

WHY YOU NEED IT

Your website is either your best salesperson or your biggest leak. Buyers decide in seconds whether you look like the premium option.

→ A site that ranks, converts and sells in six languages — working every timezone you sell into.

06 · STUDIO

Branding & Strategy

WHAT WE DELIVER

- Positioning, identity and design systems
- Market entry strategy for SEA, Europe and the Gulf
- Naming, messaging, decks and launch assets

WHY YOU NEED IT

Perception is strategy. Without deliberate positioning you compete on price by default — being a commodity is a branding decision.

→ Pricing power — and entering new markets looking like the local leader from day one.

Traffic you rent gets pricier every year; demand you engineer compounds.

07 · GROWTH

Social Media Automation

WHAT WE DELIVER

- On-brand template system + AI content engine
- Publishing automation with an approval gate
- A performance loop that learns what works

WHY YOU NEED IT

Consistency beats virality — but most brands stop posting because it costs founder-hours.

→ A daily on-brand presence produced in minutes, not evenings — without the generic AI look.

08 · GROWTH

Lead Generation & Performance Marketing

WHAT WE DELIVER

- Outbound systems: lists, sequences, deliverability, compliance
- Paid media on Google & Meta with server-side tracking
- Conversion optimisation across the funnel

WHY YOU NEED IT

A pipeline that depends on referrals isn't a pipeline — it's luck with a lag. Demand can be engineered and measured.

→ A predictable flow of qualified meetings on your calendar — instead of hoping the phone rings.

From cold list to **booked call**.

The exact engine that brought you this document: researched lists, personalised compliant outreach, AI-assisted reply handling and a direct booking page — meetings appear on the calendar, not in a spreadsheet.

Meanwhile, the compounding layer runs underneath: SEO, content and social keep earning inbound

OUTBOUND FILLS THIS QUARTER · SEO FILLS EVERY QUARTER AFTER

Every step is measured — opens, replies, meetings, revenue — so the engine improves monthly. And because it books straight into the calendar, no lead waits longer than it takes you to say yes.

Search authority that compounds — and the trust layer that opens Muslim markets.

09 · GROWTH

SEO & Content

WHAT WE DELIVER

- Technical SEO, keyword-led content, internal architecture
- Answer-engine optimisation — cited by AI assistants
- Multilingual search authority across six languages

WHY YOU NEED IT

Rented traffic gets more expensive every year; search authority compounds and stays.

→ **Traffic you own that grows month over month — in Google, and now in AI assistants too.**

10 · TRUST

Shariah Compliance & Halal Audit

WHAT WE DELIVER

- Scholar-led audit of products, finance and operations
- Certification-readiness for official halal bodies
- Led by Ustadh Dr. Muhammad Lawal (Islamic finance, INCEIF)

WHY YOU NEED IT

In Muslim markets, trust is the conversion layer. Marketing opens conversations; compliance closes them. We advise — we never certify.

→ **Certification-ready credibility that opens retail shelves and buyer shortlists.**

ANAAKA — zero to category leader

A European luxury halal skincare brand with no Malaysian presence engaged us to build one. Over 16 months and four phases — market entry, website rebuild with full tracking, pilots, licensing, distribution and ambassador partnerships — we built the ecosystem that carried the brand from unknown to category leader.

The result: a flagship store at TRX Mall, an activation at SEIBU Kuala Lumpur, and national ambassador Anzalna Nasir — on top of an owned digital ecosystem that keeps compounding.

10,446

Sessions

Website traffic built from a standing start

8,244

Users

Unique visitors, organic and paid

18.45%

Organic revenue

Revenue earned by organic search

6,432

IG followers

An owned audience, not rented reach

THE FOUR PHASES

01

Market entry

Research, positioning, halal-market strategy

02

Digital build

Website rebuild, tracking, e-commerce

03

Ecosystem

Pilots, licensing, distribution, ambassador

04

Flagship

TRX store, SEIBU activation, retail scale

Shoraka Group — finance that earns trust online

An Islamic finance group running six platforms — from consumer payments to SME factoring — needed one digital presence that makes regulated finance feel credible, modern and unmistakably Shariah-first. We built the group’s full web presence: every platform presented under one brand system, bilingual in English and Bahasa Malaysia.

Governance became a feature, not a footnote: the group’s Shariah advisors are presented openly, and a live media hub carries its real-world traction — the AFFIN collaboration, Bayar Jak Sarawak, and the Uzbekistan Raqama MoU.

6

Platforms, one brand

Raya, RinggitEase, Suyula, QuickFactor, Al-Amin, Ventures

2

Languages

English + Bahasa Malaysia, both first-class

Open

Shariah governance

Advisors presented openly as a trust feature

Live

Media hub

AFFIN collaboration, Bayar Jak Sarawak, Uzbekistan MoU

— WHAT WE DELIVERED

Full group web presence · six platform sites under one brand · bilingual EN / BM · Shariah-advisory transparency pages · media & press hub · ongoing engagement 2023–2026

Kamar Halal — trust designed in, not bolted on

A German family producer with 20+ years of halal meat craft — Sucuk, Bratwurst, Salare — needed a web presence worthy of the shelf as it moved into supermarket retail. We built the whole website and UI/UX, and consulted on presenting its halal certification.

The core decision: put trust where buyers look first. The HaPI halal certificate sits in the main navigation — not the footnote — and the site speaks German, English and Turkish, covering the home market, export buyers and the community it serves. “Halal made in Germany”, made credible.

3

Languages

German, English, Turkish — home market and export

20+

Years of craft

Family halal production from Gehlenberg, Lower Saxony

Nav

Certificate placement

HaPI halal certificate in the main navigation

Retail

Shelf-ready

Presence built as the brand entered German supermarkets

—— WHAT WE DELIVERED

Complete website & UI/UX · trilingual build DE / EN / TR · certificate-first trust architecture · product range presentation · halal-certification consulting

From finance to F&B to cosmetics

A selection of the businesses whose digital footprint we have built, scaled and run.

Islamic Finance & Fintech	Shoraka Group (six-platform finance group) · Asyraf Fauzi / Zurich Takaful · Optima (digital factoring)	Websites, UX and platforms that make regulated finance feel trustworthy — and sell.
Halal F&B & Retail	Eurogida (14 stores, Berlin) · Kamar Halal (DE) · WAKOU Ramen (TH→EU) · Matcha Madness (Köln) · niyya. (MY)	Brand, e-commerce and export-ready presence for producers, retailers and hospitality.
Beauty & Cosmetics	ANAAKA — European halal skincare, built to Malaysian category leader (flagship at TRX)	Full-ecosystem market entry: strategy, web, distribution, ambassador, retail.
Education, Public & Community	Jugendberufsagentur Brandenburg (since 2022) · ARJU learning platform · Faircharity e.V. · Rayhan Kids	Public-sector reliability with startup pace — run continuously, not shipped and left.
Engineering & Industry	B Plus Planungs-AG (Berlin) · Dig it! Company (Bavaria) · Dolezel Sicherheitstechnik (Munich)	Websites that recruit engineers and sell technical trust — plus the ops behind them.

Heritage: our founder’s Berlin agency lineage (AR City Media, 2014–2022) — cultural-fluency campaigns for BARMER, IHK Dresden and Eurogida.

We use what we sell

Pillar two of the company: products we own, built on the same stack and standards we deliver to clients. When we recommend a system, it is because we run our own businesses on it.

Noon OS

[NOON-OS.COM](https://noon-os.com)

Run your whole business from one command center — CRM, finance, compliance and analytics for the halal economy. From €19/mo, eight languages.

DeenGen

[DEENGEN.COM](https://deengen.com)

Learn crypto the halal way — knowledge first, hype never. Shariah-conscious trading education. Education, not financial advice.

Rayhan Kids

[RAYHAN-KIDS.COM](https://rayhan-kids.com)

Premium Islamic interactive products for children — games, stories and series. Child-safe by design; scholar-reviewed.

niyya.

[NIYYA.MY](https://niyya.my)

The Ummah's own cola — halal, German-crafted, born in Malaysia. Drink with intention: a share of every sale supports Palestinian orphanages.

Also in the portfolio: WebuildAI — AI automation infrastructure across Malaysia, Australia, Germany and MENA.

Sprints, **systems**, outcomes

01

Audit & scope

A free AI and digital audit; a fixed scope and quote — no surprises.

02

Build in sprints

Fixed-scope sprints, weeks not quarters, with AI-assisted delivery.

03

Launch & verify

Shipped, tested, measured — live before we call it done.

04

Run & grow

Systems retainers keep improving it: content, SEO, automation, care.

— ENGAGEMENT MODELS

Direct engagements · white-label delivery behind your agency's brand · referral partnerships.
Commercially: fixed-scope sprints, systems retainers, outcome-based and venture structures.

— THE TRUST LAYER

Islamic ethics run underneath everything we build — as values, not marketing. Scholar-led Shariah & halal audits prepare companies for official certification bodies — we advise, we never certify.

Build something worth **trusting.**

Start with a free AI audit of your business — we map where agents, automation and search authority would earn the most for you, and quote a fixed scope.
